FARMING

ORGANO-MINERAL FERTILIZER NPK

GRENA BALANCE
is recommended for
vegetables crops

FREE FROM
PHOSPHITES AND
CHROMIUM VI

SOURCE

Organic: meatmeal
and feather meal
Mineral: soft ground
rock phosphate and
potassium sulphate

Physical state: micro 2 mm - pellet 4 mm

Packaging available:

25 kg bags - 500 kg bags

A new innovative natural fertilizer, obtained from Thermal Hydrolysis of proteins rich in amino acid, humic and fulvic acids. High content of amino acid leads this product to be suitable for spring-autumn fertilizing applications, where it helps immediate root generation and propagation. This empowers the root system to absorb the essential nutrients faster therefore to stimulating the total plant growth. GRENA BALANCE has been known to on the one hand, enable the reduction of total annual fertiliser consumption and on the other hand increase the farm productivity.

The use of this product is recommended for those producers who are willing to step up sustainable agriculture and farm input efficiency management. As an additional value GRENA BALANCE contains 47% organic substance which it ensures the soil chemical and physical enhancement. Several applications of GRENA BALANCE increase the soil carbon saturation as containing high level of organic carbon (27%). This in particular increase the soil beneficial microorganisms' symbiosis at Rhizosphere level which cause under/aboveground growth increment, through high nutrients efficiency.
